7. Inviting Additional Participants	6
8. Automated Participant Emails	6
9. Trading Activity	6

Management

1. How to Manage the Trading Competition	6
2. Accessing Competition Administration	7
3. Competition Settings	8

1. Competition Creator Registration

1.1 The process begins on the Competition Creation Landing Page.

1.2 First, complete the required information for the competition creator.

Once the information has been filled out, click the Continue button.

1.3 A verification email will then be sent to your inbox. Please note that this process may take a few minutes.

After verifying your email address, you will receive a second email containing your Swiset login credentials, which can be used to access the platform later.

Note:

If you already have an existing Swiset account associated with the same email address, new credentials will not be generated. In this case, you should log in using your existing credentials.

2. Community Creation

The next step is creating the community where the competition will be hosted within Swiset.

The community acts as a private space for the traders or participants joining the competition.

In this section, you will be able to:

- Define the community name
- Upload a representative logo
- Select a primary color

3. Competition Creation

Once the community has been created, you can proceed with creating the trading competition.

Note:

The ranking evaluation method will be based on Equity Percentage (%).

During this process, you will be able to configure:

- Competition name
- Competition theme
- Duration
- Top 5 prizes (optional)
- Start date and time

Available themes include different visual categories such as sports, motorsports, and other themed experiences.

Important Considerations

- The competition duration depends on the option selected during setup.
- Only the start date is required, since the end date is automatically calculated based on the selected duration.
- The selected time will follow the browser time zone of the competition creator.
- The competition timer will automatically adjust to each participant's local time zone.

Once the setup is complete, click **Create Competition**.

4. Sharing the Competition

After creating the competition, the platform will generate a public link that can be shared with participants.

This link can be distributed through:

- Social media
- Private groups
- Trading communities
- Messaging platforms
- Any preferred communication channel

By accessing the public link, users will be able to view the competition leaderboard.

5. Public Leaderboard Info

The public leaderboard includes all key competition information, such as:

- Competition name
- Community name
- Competition countdown timer
- Registration button for new participants
- Highlight cards for the Top 3 participants
- Prize information
- Participant rankings and results

6. Participant Registration

Once the competition link has been shared, participants can register by clicking the **Register Now** button.

Register for Competition

Complete this form to register for the competition. Once registered, you'll receive your credentials and instructions to continue and start participating.

First Name: Last Name:

Check Your Email

We've sent you an email with further instructions and competition details.

ok

6.2 The registration process includes a simple registration form.

After completing the form and confirming the registration, participants will receive a confirmation message.

They will then be asked to select one of three available cards to reveal their assigned avatar for the competition.

6.3 Once the avatar is assigned, the participant will gain access to their personalized competition ranking page.

Each trader will have a customized leaderboard view featuring their selected avatar.

Note:

To see new participants joining the competition in real time, simply refresh the page.

7. Inviting Additional Participants

Inside the avatar card, each trader will find a share button.

This feature allows participants to invite other traders to join the competition quickly and easily.

8. Automated Participant Emails

After registration, each participant will receive two automated emails.

1. Welcome Email

This email includes:

- Participation confirmation
- Direct link to the competition leaderboard

2. Trading Account Credentials

This email includes:

- Demo trading account username and password
- Trading platform access details

Important Note

All competition accounts are demo accounts and do not use real funds.

9. Trading Activity

All trades executed using the assigned account will be automatically recorded and included in the competition scoring.

Recommendation

Participants should avoid trading before the official competition start date and time.

Management

1.How to Manage the Trading Competition

To manage your competition, log in to the Swiset application using the credentials sent to your email address:

Once inside the platform, navigate to the left-side menu and click on Communities.

Here, you will find the community where your trading competition is hosted.

After selecting your community, you will access your community workspace.

Within this section, you will have access to:

- A dashboard with trader activity insights
- Member lists
- General performance metrics
- Competition management tools

The main section for competition administration is the **Competitions** tab.

Here, you will be able to view:

- Active competitions
- Upcoming competitions
- Past competitions previously created within the community

2. Accessing Competition Administration

To manage a competition, select the desired competition from the list.

In the upper-right corner, click on the **View as Admin** button.

Inside the administration view, you will have access to:

- Participant lists
- General competition information
- Competition management settings

In the top-right section, you will also find a **Settings** icon.

3. Competition Settings

Within the settings panel, you will be able to modify several aspects of the competition, including:

- Adding or updating prizes
- Changing the start date (only if the competition has not started yet)
- Updating colors and visual appearance
- Adjusting leaderboard display settings
- Adding sponsor logos
- Customizing competition presentation elements

These settings allow organizers to maintain flexibility and adapt the competition experience according to their branding and community needs.

The background of the entire image is a dense, overlapping collage of numerous national flags from various countries, including Japan, France, Argentina, South Korea, the United States, Italy, and others. The flags are arranged in a way that they appear to be flying on poles, creating a vibrant and international visual theme.
